

# AR625

## TEMPERATURE CONTROLLER

- 1 universal measurement input (for thermoresistance, thermocouple or digital temperature probes AR182 and AR183)
- 2 control outputs, relay or for SSR control
  - output 1: ON-OFF with hysteresis, PID, AUTOTUNING PID
  - output 2: ON-OFF with hysteresis
- automatic selection of PID parameters function
- programmable operating characteristics (process controller, ramping)
  - 4 stages, ON-OFF controlling with hysteresis
  - 2 timers, setting range up to 144 hours
  - temperature gradient in the first stage ( $0,1 \div 30,0^{\circ}\text{C} / \text{min}$ )
- triple digital LED readout with adjustable brightness
  - **UPPER** display      - measured value
  - **BOTTOM LEFT** display      - set 1 value
  - set 2 value
- line resistance compensation for resistive sensors
- thermocouple cold junction temperature compensation
- programmable input type, digital filtering, adjustment options, access and other configuration parameters
- access to configuration parameters protected by user password
- methods to configure parameters
  - via membrane keyboard IP65 located on the front panel
  - via PRG port (AR955/AR956 programmer) and free software ARsoft-CFG (Windows 7/8/10)
- software and programmer enabling viewing of the measured value and quick configuration of single or ready-made sets of parameters previously saved in the computer for reuse, for example in other controllers of the same type (configuration duplication)
- panel housing, IP65 from front, IP20 from connectors side
- high accuracy, long-term stability as well as resistance to interference
- wide range of supply voltages ( $20 \div 250\text{Vac}$ ,  $22 \div 350\text{Vdc}$ )

**Contents of set:**

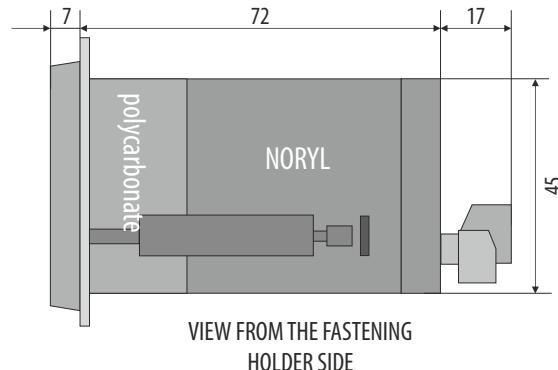

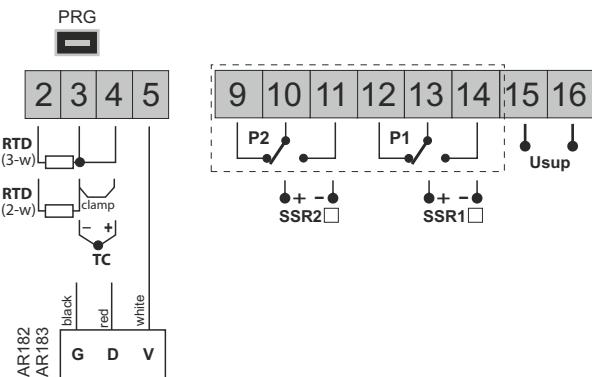

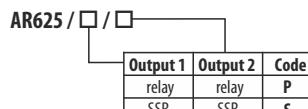

- controller with handles mounting
- user manual

**Available accessories:**

- AR955/AR956 programmer
- AR182/AR183 digital temperature probe

**INSTALLATION DATA**

|   |   |
|---|---|
| <b>Dimensions</b>                                     | 96x48x79 mm   |
| <b>Panel window</b>                                   | 92x46 mm  |
| <b>Fixin method</b>                                   | panel, grups on the side of the enclosure                             |
| <b>Material</b>                                       | self-extinguishing NORYL 94V-0, polycarbonate                         |
| <b>Conductor cross-sections (separate connectors)</b> | 2,5mm <sup>2</sup> (supply and output 1), 1,5mm <sup>2</sup> (others) |

**Ordering procedure**

**Order example**

AR625 / P / P

Ar625, output 1 relay, output 2 relay

## TECHNICAL DATA

| Universal input (programmable)                                    |  | measurement ranges   |
|---|--|--|
| - Pt100 (RTD, 3- or 2-wire)                                       |  | -100 ÷ 850 °C  |
| - thermocouple J (TC, Fe-CuNi)                                    |  | 0 ÷ 880 °C   |
| - thermocouple K (TC, NiCr-NiAl)                                  |  | 0 ÷ 1200 °C  |
| - thermocouple S (TC, PtRh 10-Pt)                                 |  | 0 ÷ 1750 °C  |
| - thermocouple B (TC, PtRh30PtRh6)                                |  | 300 ÷ 1800 °C  |
| - thermocouple R (TC, PtRh13-Pt)                                  |  | 0 ÷ 1600 °C  |
| - thermocouple T (TC, Cu-CuNi)                                    |  | 0 ÷ 380 °C   |
| - thermocouple E (TC, NiCr-CuNi)                                  |  | 0 ÷ 700 °C   |
| - thermocouple N (TC, NiCrSi-NiSi)                                |  | 0 ÷ 1300 °C  |
| - digital temperature probe AR182                                 |  | -50 ÷ 120 °C   |
| - digital temperature probe AR183                                 |  | -50 ÷ 80 °C  |
| <b>Number of measuring inputs</b>                                 | 1  |  |
| <b>Respond time for measurements (10 ÷ 90%)</b>                   | 0,5 ÷ 2 s (programmable)   |  |
| <b>Resistance of leads (RTD)</b>                                  | $R_s < 30 \Omega$ (for each line)  |  |
| <b>Resistive input current (RTD)</b>                              | $\sim 250 \mu\text{A}$ (Pt100)   |  |
| <b>Processing errors (at 25°C ambient temperature):</b>           |  |  |
| - basic   | - dla Pt100  | 0,2 % of measuring range ±1 digit  |
|   | - dla termopar   | 0,3 % of measuring range ±1 digit  |
| - additional for thermocouples                                    |  | <2 °C (thermocouple cold junction temperature compensation)  |
| <b>Resolution of measured temperature</b>                         | 0,1 °C or 1 °C   |  |
| <b>Communication interface</b>                                    | - PRG programming link (no separation) for AR955/AR956 programmer  | - bitrate 2,4 kb/s,<br>- format 8N1 (8 data bit, 1 stop bit, no parity bit),<br>- MODBUS-RTU (SLAVE) protocole |
| <b>Outputs P/SSR</b><br>(relay or SSR)                            | - relays (P1, P2), standard<br>- SSR (SSR1, SSR2), optional  | 8A / 250Vac (for resistive loads), SPDT<br>transistor type NPN OC, 10,5 ÷ 11V, with limiting current to ~25mA  |
| <b>Display</b> 7-segment LED, two-rows with brightness adjustment |  | - upper, red 14mm, 4 digits<br>- bottoms, green 7mm, 2 x 4 digits  |
| <b>Signalling</b>   | - relays active<br>- messages and errors   | LED diodes, red<br>LED display   |
| <b>Power (Usup)</b>   | - universal, in accordance with 24V and 230V voltage   | 20 ÷ 250 Vac, <3VA (AC voltage, 50/60Hz)<br>22 ÷ 350 Vdc, <3W (DC voltage)                                     |
| <b>Rated operating conditions</b>                                 | 0 ÷ 50°C, <90 %RH (no condensation)  |  |
| <b>Working environment</b>  | air and neutral gases  |  |
| <b>Protection rating</b>  | IP65 from the front, IP20 of the connectors side   |  |
| <b>Weight</b>   | ~185g  |  |
| <b>Electromagnetic compatibility (EMC)</b>                        | - immunity acc. to PN-EN 61000-6-2<br>- emmission acc. to PN-EN 61000-6-4  |  |
| <b>Safety requirements according to PN-EN 61010-1</b>             | - overvoltage category - II<br>- pollution degree - 2<br>- voltage to the ground (earth) for power supply and output relay circuits - 300 V<br>- voltage to the ground (earth) for other inputs/outputs circuits and communication |  |
|   | - rezystancja izolacji >20 MΩ  |  |
|   | - wysokość n.p.m. <2000 m  |  |
